Cleanfield Energy to Install Wind Turbine at University of Regina, Saskatchewan

Date Posted: June 25, 2008

Ancaster, ON -- **Cleanfield Alternative Energy Inc.** announces that it is installing its **V3.5 Vertical Axis Wind Turbine** on the **University of Regina** main campus.

Cleanfield Energy, in collaboration with its Saskatchewan dealer, **Shamrock Energy Systems Ltd.**, has entered into a sales contract with the University of Regina.

The University of Regina in conjunction with the United Nation's Regional Centre of Expertise on Education for Sustainable Development (RCE - Saskatchewan) is undertaking a long term educational and research initiative to address sustainable development.

The addition of the first Cleanfield turbine will contribute to this initiative and to Saskatchewan's role as an educational and industry leader in bringing alternative energy solutions and education for sustainable development to the province and to the rest of the world.

Dr. Malcolm Wilson, Director of the Office of Energy and Environment at the University of Regina said:

"We are very fortunate to be entering into this venture with Cleanfield as we know together we can make a difference in 'how we do energy' in Saskatchewan."

Dr. Garth Pickard, who is directing Phase One of the comprehensive educational and research initiative said:

"The University of Regina is focused on research and training related to alternative energy technologies and education.

"The RLC sites of the University of Regina and Craik, Saskatchewan town site are geographically positioned within the existing RCE—Saskatchewan corridor.

These two locations provide for easy research accessibility, public visibility, educational training, resource servicing and for the town of Craik, an affirmation of the town's commitment to sustainable practice.

Cleanfield is now part of our community and working with them will serve all of us well.

I know that together Cleanfield and the University of Regina will make a significance difference in what we know, what we teach and how we practice sustainability."
